

IMAGE DISPLAY DEVICE AND METHOD THEREOF

Abstract of Disclosure

A liquid crystal display includes a first TFT for controlling a supply of a display signal to a pixel electrode, a second TFT connected to the first TFT, and a third TFT connected to a data line. The third TFT controls the supply of a display signal to the pixel electrode. The second and third TFTs are connected to a gate line G_{n+1} , and the first TFT is connected to a gate line G_{n+2} .
